

Sabre Communications

Sabre Communications Corporation is a wholly owned subsidiary of Sabre Industries, Inc. and is operated jointly with CellXion, LLC.

Sabre, headquartered in Sioux City, Iowa, is the market leader in the design, engineering, and manufacturing of tower and other infrastructure products and services for the wireless telecommunications industry. The company is also a leading provider of electric utility transmission and distribution structures for energy companies. For more than 30 years, Sabre has designed and manufactured guyed towers, self-supporting towers, monopoles, and tower components. Sabre's services include tower analysis, tower inspection, turnkey installation and tower modifications. The company's tower division, Sabre Towers and Poles, designs and manufactures a complete line of tower structures. Sabre Site Solutions, Sabre's components division, supplies tower parts and accessories including pre-engineered lightweight towers. Sabre Tubular Structures, Sabre's tubular steel pole division, offers structures used in power delivery, telecommunications, sports and high mast lighting. Sabre Galvanizing, Sabre's galvanizing division, is the most efficient and environmentally-friendly general galvanizing facility in the United States. Sabre has industry leading design and engineering capabilities that enable it to meet the needs of its telecommunications and utility customers through the manufacture of site-specific towers and monopoles.
